

Westside Endocrinology — Patient Portal Message

From: Dr. L. Reyes, MD (Endocrinology) **To:** Robert Chen (and authorized proxy) **Sent:** June 16, 2026, 4:12 PM

Hello Robert,

Following your recent A1c results, we're adjusting your diabetes medications:

- **STOP: Glipizide 5 mg.** Please discontinue.
- **START: Glimepiride 2 mg, once daily in the morning,** taken with breakfast.
- **Continue** metformin 1000 mg twice daily, unchanged.

Please watch for any low-blood-sugar symptoms in the first two weeks and keep your morning glucose checks going. No need for a separate visit; we'll review at your regular appointment.

Best, Dr. Reyes
