

Bayview Neurology Associates

After-Visit Summary

Patient: Robert Chen **DOB:** 03/14/1954 **MRN:** BNA-0049217 **Date of Visit:** June 19, 2026
Provider: Dr. A. Okafor, MD (Neurology) **Reason for visit:** Follow-up, early-stage vascular dementia

Visit Summary

Mr. Chen returns accompanied by his daughter. Compared to the March visit, family reports mild progression of afternoon disorientation. Exam stable. We discussed goals of care and started a cholinesterase inhibitor trial.

Assessment

1. Vascular dementia, early stage — discussed expectations of a medication trial.
2. Reviewed cardiovascular risk factor control with PCP/cardiology (no changes made by us).

Plan & New Orders

- **START: Donepezil 5 mg, by mouth, once daily in the morning.** Reassess tolerability at next visit; may titrate later.
- **LAB ORDER:** Comprehensive Metabolic Panel (CMP) — **to be drawn before your next visit.** Standing order sent to Bayview Lab; patient to schedule the draw.
- Continue all other current medications as prescribed by other providers.
- Counseled family on common GI side effects of donepezil; call the office if severe.

Follow-up

- **Next neurology visit: July 10, 2026, 10:00 AM** with Dr. Okafor.
- Bring an updated medication list to that visit.

Care Team Notes

Patient has a home health aide on Mon/Wed/Fri mornings. Family to coordinate medication administration.
